

Setup before running script:

1. Create a Dummy patch with all required settings:

2. In Hybrid, load first patch in the folder to be processed:

```
14  
15 ; !!!!! Change to folder that contains patches to Unify  
16 Source_dir := "C:\Program Files (x86)\AIR Music Technology\Hybrid\Presets\08 Arpeggios\*.tfx"  
17
```

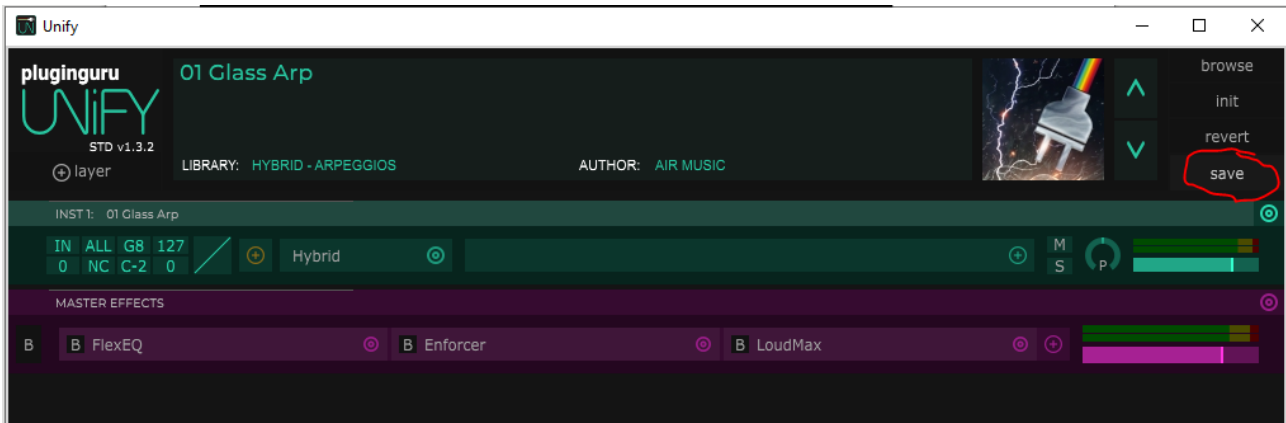

3. Run script

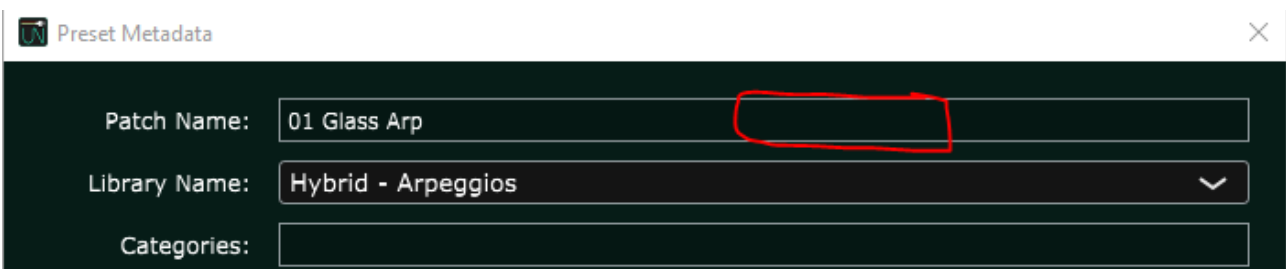

Explanation of the save patch part of the script:

; Save UNIFY patch

MouseClick, left, 1413, 306 (Click Unify Save button to open dialogue.)

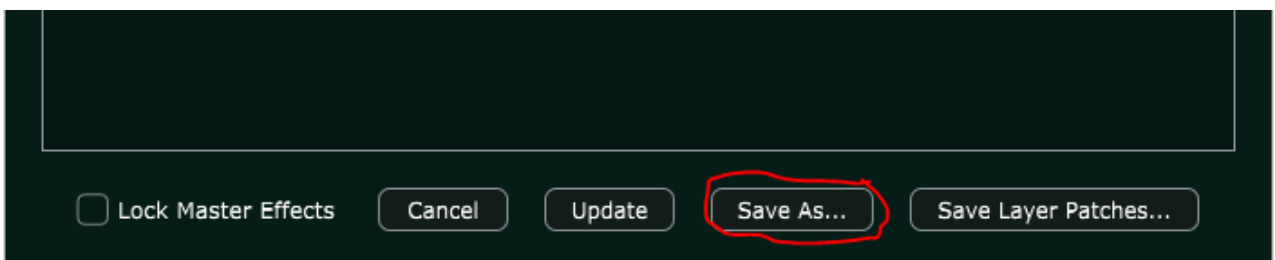

MouseClick, left, 1071, 332 (Click in patch name field to select)

Send, ^a (Select all (Ctrl +a))

Send, %OutNameNoExt% (Paste name of patch retrieved earlier in script.)

MouseClick, left, 1021, 772 (Click Save as... button)

Send, {Enter} (Since Save as is default in Windows file save, Enter is enough.)
